Beyond the Standard

LEASE TO OWN OPTION

Food Service Professionals are faced with unique challenges and opportunities when making equipment and facility design decisions for their food nutrition programs. With the current state of the economy, food service operators are faced with a multitude of budgetary concerns in their operation. Operators are working on a shoestring budget that doesn't allow for any upgrades, but not replacing the equipment actually costs more to operate than not doing anything to change the situation. Food Service Directors are hard pressed to come up with a feasible solution to meet these challenges

Multiteria is proud to meet this challenge by offering an aggressive "Lease to Own Option" that would provide the benefit of a brand new servery that will increase participation and revenue and will be affordable to your facility. This provides the opportunity to purchase a full serving line today and then pay off the cost with evenly spaced monthly payments which would be part of the total operating budget today with the advantage of room to grow and add on tomorrow.

Please call today, Multiteria can provide you instantly with a sample monthly payment schedule for your review. We continue to partner with food service professionals to provide solutions that offer tangible results.

Multiteria specializes in serving counters and serving systems.
